CIGARETTE PACK COMPRISING A SLIDE AND CASE**STATEMENT OF RELATED APPLICATIONS**

- 5 The above-captioned patent application is the Unites States Patent Cooperation Treaty (PCT) Chapter II National Phase of International Application No. PCT/EP03/03754, having an International Application Date of 11 April 2003, which in turn claims priority on German Patent Application No. 10218558.1, having a filing date of 25 April 2002, designating the United States of America.

10

BACKGROUND OF THE INVENTION**1. Technical Field**

- 15 The invention relates to a pack having a slide and an outer shell which at least partially encloses the slide, is open at both ends and is intended, in particular, for accommodating a cigarette group, the slide having at least one base wall.

2. Prior Art

20

- Cigarette packs configured with shells and slides are known internationally, although up until now they have not been used as widely for cigarettes as hinge-lid boxes or soft-carton packs. In the case of slide and shell packs, the cigarette group is enclosed by an inner blank made of tin foil or paper. The resulting
25 cigarette block is seated in the slide comprising a base wall, side walls and an end flap and closure flap. For removal of the pack contents, the slide is pushed part of the way out of the shell, with the result that the pack contents are exposed in the region of the closure flap.
